VMultra™ drive

External USB All-In-One | Quick Start Guide

VELOCITY micro

Connecting

1. Connect the included USB cord to the back of the VMultra drive.
2. Connect the other end of the USB to your desktop or laptop.
3. Drivers will install automatically.

External Power

The VMultra™ drive is powered by the USB port. You will only need to connect the external power supply when running multiple applications.

Using the DVD-RW

1. Press the button on the front of the VMultra drive to open the DVD tray.
2. Insert your media disc.
3. Slide the tray closed. It will click in place.

Using the SD/SDHC/MMC Card Slot

1. Insert your media card face up in the SD card slot. It will click into place.
2. To remove, push inward and release.

Using the USB 3.0/2.0 Ports

Connect any USB 2.0 or 3.0 device to the appropriate ports on the side of the VMultra™ drive. USB 3.0 is backwards compatible.

(USB 3.0)   (USB 2.0)   (USB 3.0)

Using the Hard Drive

You'll need to format your hard drive at first use. To do so, connect via USB, navigate to "My Computer", right click the drive, and select "Format".

⚠ *DO NOT FORMAT* your PC's internal drives.

Note – you must have an internal HDD installed in your VMultra™ drive to use this function.

**Note* – for information on using the VMultra™ drive with Mac OS or Linux, visit VelocityMicro.com/Support.
